

## A clean business relationship

### Aqua Systems, Inc.

AQUA SYSTEMS, INC. was founded by two restaurateurs in 1984. The original purpose was to cater to independent owner/operators on California's Central Coast, because they felt that none of the other chemical companies really understood the restaurant business from an owner's perspective.

Since its establishment 22 years ago, Aqua Systems, Inc. has gained the reputation of being the most recognized and esteemed laundry, ware wash, housekeeping, and food processing consultants on the Central Coast. Our dedicated servicemen are coached and trained to be knowledgeable, hard working, and honest as they strive to meet our customers' needs.

Due to our TEAM FIRST attitude, our company experiences very little turnover which rewards you with a stable core of servicemen who are dedicated to building long-term trusting relationships with our customers.

Our average employee tenure is more than

15 years. This enables us to concentrate on your needs, as opposed to spending valuable time retraining our team to perform to industry standards as well as satisfying your opera-

tion requirements. In short, we know our long-term customers' operations as well as they do, and in many cases better.

Our products are highly concentrated

resulting in low overall per occupied room (POR) costs. This product line is providing excellent linen results throughout the state of California currently with distribution centers

in San Luis Obispo, Santa Barbara, Ventura, Los Angeles, Kern, Fresno, Monterey and Sacramento Counties.

We have tremendous experience in fine

quality linen as we currently have set new standards for several four-diamond properties in the area. We have the experience to assist your staff with the proper levels of chemical consumption to ensure soft, fresh, and bright linen results with very low tensile strength reduction, thus lowering linen replacement costs.

AQUA SYSTEMS, INC. is the only locally owned and operated manufacturing company in our industry. We are constantly striving to serve and protect our environment. We are the only local manufacturer which recycles. All of our processes are done locally. We maintain a work force that lives locally, which gives our customers a better return from the dollars spent with our company as opposed to those operated outside the area.

However, the main competitive advantage our local work force offers is a stable, highly trained dedicated team of servicemen who provide the quickest response time and quality service on the Central Coast.
